Become a Sponsor

Sponsorship increases the show experience for attendees and key decision makers through multiple channels throughout the exhibition, conferences, and special events. The BIOGAS AMERICAS 2023 event provides the ideal platform to think outside your booth and showcase your brand. Several opportunities are available to help you achieve your specific objectives and enhance your outreach at this international event.

About BIOGAS AMERICAS

BIOGAS AMERICAS 2023 is the biggest gathering of the US biogas industry and the annual conference of the American Biogas Council. This is a "must attend" event for anyone in the business of biogas – a place to meet with like-minded professionals and leadership across the industry. With a focus on growing the biogas market through informing, training and networking with potential clients, vendors and industry champions, being part of this event is not an expense, it's an investment.

BIOGAS AMERICAS GRAPHIC GUIDELINES

DOCUMENT SIZE & SPECS

•All artwork should be created at 100% size at 150 dpi or in a proportionally scaled down format.

examples: 50% at 300 dpi OR 25% at 600 dpi

•Please mark artwork size if scaled down.

example: DESIGNED AT 50%

- •All content should be kept within the live area, leave approximately 2" all the way around artwork to ensure sign holder or structure metal does not cut off content.
- •When working between Adobe programs, DO NOT copy & paste objects from Illustrator to InDesign files. This causes objects to not print correctly. Save elements from Illustrator and place them in InDesign.

ACCEPTABLE FILE FORMATS

Shepard uses the most current version of Adobe Creative Cloud®. If providing native files from another version, please also provide an .idml file. **WE DO NOT ACCEPT**: Microsoft® Word®, Excel®, or PowerPoint® files.

PROGRAM	FILE EXTENSION	SPECIAL CONSIDERATIONS
人 Acrobat	.pdf	Must be high resolution with fonts embedded.
InDesign	.indd or .idml	Images embedded and fonts changed to outlines or send a packaged file with fonts and images.
Ai Illustrator	.ai or .eps	Vector artwork. Images embedded and fonts changed to outlines or send a packaged file with fonts and images.
Ps Photoshop	.psd .tiff .jpeg .eps	Raster artwork. Must be built in CMYK color space.

COLOR

- Artwork must be created in the CMYK color space.
- •If PMS color matching is required during the printing process, please use Pantone®+ Solid Coated swatches in your artwork.
- •Converting color from RGB to CMYK will change the vibrancy and the look of some effects, DO NOT design artwork in RGB. Colors may vary due to output devices.

RGB Color Space.

CMYK Color Space.

FONTS & LINKS

If creating artwork in Adobe® InDesign® or Illustrator® there are two options when supplying fonts.

- •Change fonts to outlines. This prevents fonts defaulting or being substituted throughout the layout and production process. REMEMBER: if creating outlines, text is no longer editable.
- •Package the fonts. From InDesign or Illustrator select File → Package → Check "Copy Fonts" and submit PC format TTF fonts or OTF fonts with your artwork.
- •Package the links. From InDesign or Illustrator select File → Package → Check "Copy Linked Graphics" and submit all images with your artwork.

Artwork can be created in several ways. Here are some things to consider.

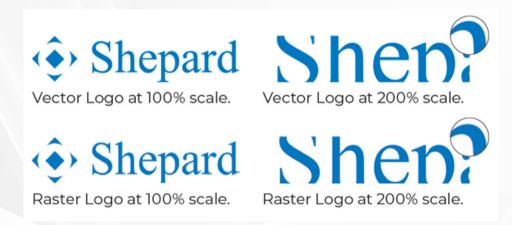

VECTOR

- •Vector-based artwork is resolution independent and can be enlarged or reduced without loss of quality.
- •This is the preferred file type and is most often created in Illustrator and used for creation of logos and icons.

RASTER

- •Raster-based artwork is resolution dependent and will reproduce poorly if the appropriate file resolution is not supplied correctly.
- •If supplying raster art, it is best to save your artwork in a 1 to 1 (full size) output ratio at 150 dpi or higher. Lower resolutions (1MB or smaller) will result in reduced image quality. File size should not exceed 200MB (if possible).
- •Raster images are most often created in Photoshop and is most often used for photographic images.

RESOLUTION

•Artwork should scale to 150 dpi at 100% scale to ensure the artwork remains high resolution when printed at full size. See examples and samples below.

examples: 1:1 or 100% - resolution no less than 150 dpi

2:1 or 50% - resolution no less than 300 dpi

4:1 or 25% - resolution no less than 600 dpi

- •Images pulled from the Internet are NOT suitable for high quality, large format printing. These images are low resolution and will not reproduce well.
- •Verify resolution by viewing artwork on the screen at full size in high definition. Observe image from different distances away, artwork is typically viewed from a couple feet away.

BEFORE SENDING FILES

•Please name your files appropriately for easy identification examples:

Poster_22x28.pdf Panel A_1920x898_Qty3.pdf Shepard_Booth1905_Panel A.pdf

•Clients should compress information that they transfer electronically (.zip).

NOTE: Please provide a JPEG thumbnail or low resolution PDF of the graphic for the Account Executive to view, this helps when creating/entering orders in our system.

SUBMITTING YOUR FILES

- •Email Attachment. MAXIMUM SIZE: 10MB
- •Large File Transfer Sites: DropBox, YouSendlt, WeTransfer, Hightail, etc.
